Reznikov Vadim

Product Designer

About Me

Hi, I'm Vadim. 8 years in product: B2B/B2C SaaS, CRM, IoT, fintech, white-label, and mobile services. I combine UX research and metrics with AI tools. A design system in Storybook sped up development by 30%, and payment conversion grew from 45% to 68%. I have team-lead experience. Looking for a role built around AI tools in the workflow.

Recent projects

September 2023 — to the present

Senior Product Designer → DSSL

Led a design team, owned web/mobile interfaces for a video surveillance CRM: UX research, A/B testing, a modular token-based design system (white-label), integrated into Storybook via Cursor (−30% dev handoff time). iOS redesign: event search time 32→18 sec, Retention D30 +7%, cloud plan conversion +9%. Payments: conversion 45%→68%, support tickets −77%. Notifications: churn 18%→9%, NPS 17→28.

January — August 2023

Senior Product Designer → HEADS & HANDS

Ruslimat: a B2B cart cut checkout time for 20+ item orders from 12 to 7 min (−42%), and a "Reorder" flow added +8 pp to repeat purchases within 60 days. Sportmaster: an AI-powered banner builder cut build time from 40 to 27 min. Wellness service: Retention D30 6%→8.2%, session time +20%. URALS.PRO: won the pitch against 3 studios and 9 designers. For an industrial client, designed a mobile business app based on UX research and prototype testing.

May 2019 — December 2022

Product Designer → TomskSoft, LLC

Led the full product design cycle for cross-platform apps: Camfrog (100M+ downloads), Paltalk (10M+ on Google Play), and ManyCam. Validated hypotheses using Amplitude and Firebase Analytics, ran UX research and usability tests. Built a white-label design system supporting 15+ languages (including RTL) for a multi-million-user audience. For ManyCam, designed the entire website — from homepage to pricing — building out CustDev and the design system from scratch.

May 2019 — December 2022

Product Designer → S Media Link

Designed interfaces for fintech, CRM, marketplaces and high-load systems. Led the full design process: CustDev, CJM, User Flow, prototypes, design systems. Presented and defended solutions to clients. Clients in the following areas: Fin-tech, HR-tech, Prop-tech, Med-tech.

July 2012 — July 2017

Early experience

Web design, branding, identity, printing. Art management and marketing (KPI growth up to 35%). HTML/CSS/JS layout

Portfolio

Hard Skills

Figma (Expert), Adobe, prototyping, high-detail, design systems, tokens, White-label support, in-depth interviews, CustDev, Usability testing, CJM, User Flow, User-Centered Design, Design Thinking and JTBD, Product metrics, funnel analysis, hypothesis formulation and verification, and/B tests, HTML5/CSS3, iOS HIG, Android Material Design, AI tools, Cursor, Claude Code.

Soft Skills

Agile, Scrum, defending design solutions to stakeholders and working with feedback, mentoring experience, conducting design reviews. Native Russian language, English B2

Additionally

I constantly reinforce my knowledge of UI/UX architecture with articles and books. Then I write a summary of the knowledge I have gained, for example: summary and translation of the book "Refactoring UI" by Adam Wathan and Steve Schoger

Sometimes I share my experience with the community and give lectures at a local design school, here is one of the presentations link to the lecture in Figma
